ONLINE TEST · CANDIDATE GUIDE

Before you start your online test

Read this carefully — it explains what you need and what gives a warning.

1 What you need

- **A laptop or desktop with a webcam and microphone** (recommended), with the latest **Google Chrome** or **Microsoft Edge**. A phone also works, but on a phone screen sharing is not possible.
- **Taking the test on a phone?** Keep it on a stand or against something, front camera facing you, face fully visible. Turn on **Do Not Disturb** so calls and notifications don't take you out of the test.
- **Stable internet** and a charged laptop / phone (keep the charger connected).
- **A quiet room where you are alone**, with light on your face (the light should be in front of you, not behind you).
- Open the test link in **Chrome**. If it opens inside WhatsApp, tap ⋮ → **Open in Chrome**.
- Keep your **mobile number** ready — **HR will tell you the OTP**.

2 Pen, paper & stationery

Allowed

- 1–2 **blank sheets** for rough work
- **Pen or pencil**, eraser
- A glass of water

Not allowed

- **Mobile phone** (switch it off and keep it out of reach)
- **Calculator**, smartwatch, earphones
- Books, notebooks, notes, printed papers
- Another laptop, tablet or second screen

- **No paper? Use the on-screen Rough sheet** — click ✏️ **Rough sheet** at the top of the test to write with the mouse / finger, or type your calculations. It is saved automatically.
- Before starting, **show both sides of your blank sheets to the camera** for a few seconds.

- Use **loose sheets, not a notebook** — a notebook or book in view can be flagged as “Book / notes”.
- While writing rough work, **look up at the screen regularly**. Looking down for more than 30 seconds at a stretch gives a warning.

3 What gives a warning

Your camera, microphone and (on a laptop) your whole screen are recorded during the test. Each of these gives a **warning with a beep**, and **HR is alerted live** with a photo:

- **Switching to another tab, window or app, or minimising the test**
- **On a phone: opening another app, the home screen, the notification panel or split screen, or locking the phone**
- **Clicking outside the test window**
- **Leaving full screen (pressing Esc)**
- **Your face is not visible — leaving the seat or covering the camera**
- **Another person is seen in the camera**
- **Looking away from the screen (left, right, up or down) continuously for more than 30 seconds**
- **A mobile phone, book, notebook or another laptop / screen is seen in the camera**
- **Talking, or loud voices / noise in the room**
- **Moving a lot, or moving out of the camera frame**
- **Turning off or blocking the camera**
- **Laptop / computer: stopping screen sharing, or sharing a window instead of the entire screen**
- **Copy, paste or right-click**
- **Shortcut keys such as Ctrl+P, Ctrl+S, Ctrl+U, F12 or Print Screen**
- **A second monitor connected, or resizing / splitting the window**

⚠ **Too many warnings end the test automatically** (the limit is set by HR — usually 5). Your answers up to that point are submitted.

4 During the test

- Allow the **camera and microphone** when the browser asks. On a laptop, click **Share entire screen** and choose **“Entire screen”**.
- The test runs in **full screen** with a **timer**. It is **submitted automatically** when the time ends.
- You can answer in any order: **Skip** a question and come back to it with **Previous** or the question numbers. Skipped questions show in red.
- Answers are **saved automatically**. If the page closes by mistake, open the **same link** again — the timer keeps running.
- There is **no negative marking** — a wrong or skipped answer gets 0.
- HR may start a **video call or chat** during the test — answering them is allowed.

5 If something doesn't work

- **Camera blocked:** click the 🔒 / camera icon in the address bar → allow Camera and Microphone → reload the page.
- **Camera busy:** close Zoom, Meet, Teams or any other app using the camera.
- For any other problem, **contact HR before starting** the test.

All the best!
